

Mr. A says:

11 years ago I was in a lot of pain from an injury – pain killers and doctors weren't working and the best that was offered was an operation with 50% chance of success. My wife started to nag me to try a chiropractor, so in a bid for a quiet life, I found the Camberley Chiropractic Clinic.... the result: no operation and a better life with a condition that's well and truly under control. I don't visit as often these days, but the team have had a huge impact on my family's life – so much so that our daughter has now set her sights on going to Chiropractic College. Many thanks.

Mrs. S reported:

I have had 3 separate accidents this year, damaging my neck and upper back. I was recommended to the clinic by a close friend. Thanks to the expertise and kindness of Dr. Everret I am back to being able to lead a normal life again. The reception staff are always very welcoming, efficient and prepared to "go the extra mile". I have no hesitation in recommending Camberley chiropractic clinic to family and friends.

Mrs. C-S said:

Before treatment I had stabbing pains in my left elbow, numb hands and pain on moving my neck. The elbow and neck pains prevented many activities not least lifting shopping, changing bed linen and gardening. Since my course of treatment from Doctor Walker the pains and numbness have gone. I continue with the exercises and sincerely hope to prevent recurrence. I appreciated the pleasant atmosphere of the clinic and the friendly yet professional manner of all the staff. Thanks to you my life is back on track. I have already recommended you to my partner.

Mr. L says:

I visited my GP several years ago suffering with chronic lower back pain and he referred me to a physiotherapist who was unable to help and referred me to an osteopath who also couldn't help. I was then referred to the hospital by the GP who eventually said I would have to wear a support belt for the rest of my

life. I was not prepared to do this and a friend suggested chiropractic could help. I visited Camberley Chiropractic Clinic and with a few treatments the pain had disappeared and I was mobile again. Chris Walker has shown me how to exercise and stay supple and I now visit annually for an 'MOT'.

Mrs. H stated:

After a car accident, I suffered for 10 years with severe headaches. The headaches were so bad I had to spend 24 hours in bed to recover which made looking after my three young children impossible. After even one treatment the relief was wonderful, I needed further help to complete the initial healing of my neck problem and checks to maintain my health from then on.

Chiropractic has given me my life back. I never hesitate to highly recommend a visit to the Clinic for a health check and now many of my family friends and colleagues are patients too. From the moment you contact the clinic you are warmly welcomed and put at ease. Nothing is too much trouble for the team and your health always comes first.

Mrs. M says:

I had been in pain from neck and back problems which had impacted on every aspect of my life. Fortunately a friend recommended Dr. Walker. I had been rather reluctant, as had always used Physiotherapy but I gave it a go and have never looked back. He is now the first person I see to keep my body moving and pain free. Everybody at the clinic is always kind, courteous and professional and I recommend the clinic as often as possible.

Mr. H stated:

I had almost permanent back-ache and shoulder-ache. After my initial assessment I had a number of sessions which alleviated and then eliminated these. I also received great advice on posture, sitting and after heeding the advice, purchasing a back-friend and a memory pillow, my mobility was vastly improved (as was my sleep). I'm always made to feel welcome and the sessions are informal and relaxed. Altogether visiting the Clinic was one of the best decisions that I've ever made.jn

Mrs. N comments:

Where to start? In early September I hobbled into the Camberley Chiropractic Clinic hardly able to put my right foot to the ground. The treatment was started immediately but as time progressed I became concerned because I had the holiday of a lifetime booked for the first week of November. I was beginning to have doubts as to whether I would be fit to make the 13 hour flight. After 8 weeks of care during which I made small but consistent improvement every week until on the 8th of November I was able to check in for my flight. It was not an easy process but thanks to the skill and dedication of Dr. Walker and the team at the Clinic I was able to enjoy a fabulous holiday without restricted movement or pain. Many thanks to everyone at the Camberley Chiropractic Clinic.

Mr P. T says:

I was a complete sceptic on chiropractic as a viable alternative medicine. I had intense pain in my shoulder and arm and as the prescribed pain killers were ineffective, I felt that I had nothing to lose. I was amazed that after a few treatments the pain was controlled and then gradually subsided. I would recommend anyone with spinal pain to seek the services of a professional chiropractor such as those at Camberley Chiropractic Clinic.

Mrs S. P says:

Serious back pain in 1994 led me, initially, to my GP who suggested that I contact Camberley Chiropractic Clinic. It was there that Chris discovered lower back disc deterioration and started an intensive program of treatment in his charming way (who's going to argue with 6ft plus of Canadian?) That, with some help from frozen peas, sorted me out so that I eventually arrived at only having to have an annual MOT. I am a very sports minded person and the unexpected pain was seriously disrupting my life. Now, I do all sports happily. At all times everyone in the practice has been friendly, efficient, and professional and I recommend the practice wholeheartedly whenever appropriate. Long may it prosper.

Mrs S said

I tottered painfully into your clinic using two walking sticks and totally unable to stand upright. The pain in my groin and leg was excruciating, and I had no idea what had caused it. Neither did my GP. However after three weeks of treatment I'm delighted to say I can now stand upright, without pain, and walk normally, without sticks. Thank you so much for your successful treatment and your kindness and courtesy.
